

Ultra-Mag

Description: Premier Ultra-Mag is a highly palatable molasses feed for reducing the risk of grass tetany. It contains a high level of readily available magnesium, easily available energy and moderate levels of protein.

Typical Analysis (As Fed Basis):

Dry Matter	64.0%
Crude Protein	8.7% (± 2%)
Sugars	31% (± 2%)
Fibre	Nil
Oil	Trace
Ash	13.3%
Magnesium	2.5%
Calcium	0.5%
Phosphorus	0.2%
Potassium	1.4%
Sodium	0.6%

Feeding Guidelines: Ultra-Mag is a very flexible ingredient – ideal for feeding in the milking parlour via a liquid feed system. It can be topped dressed on forages, mixed with dry feeds, or fed in a diet feeder as part of the TMR. Ensure uniform mixing of liquid and other ingredients in the mixer wagon before start of feeding. It can also be fed free access through lick wheel/ball feeders.

Dairy and Beef Cows: Use for 3-10 weeks during periods of rapid grass growth.

Feeding Rate:

Grass Tetany Risk:

Low to moderate risk - 0.75-1kg/head/day
Moderate to high risk – 1-1.5kg/head/day
High risk – 1.5-2kg/head/day

Key Benefits:

- ✓ Contains highly available Magnesium;
- ✓ Good source of energy;
- ✓ Reduces meal requirements;
- ✓ Extremely palatable;
- ✓ Flexibility of use;
- ✓ Ideal complement to grass.

Storage: Can be safely stored in vented waterproof tanks for up to 6 months. Care should be taken to ensure they are cleaned twice annually to ensure no build-up of sediment.

Delivery: Ultra-Mag is available in bulk deliveries nationwide, ranging from 10 up to 28 tonnes. Also available in IBC's (mini bulk tank) of approximately 1.25 tonnes.

Note: It is recommended that a specialist opinion be sought before use.
