

Cane Molasses

Description: The original energy feed! Cane molasses is a by-product consisting of the syrupy residue collected during the manufacture or refining of sugar from sugar cane. Characterised by its excellent palatability and flexibility of use.

Typical analysis (Dry Matter Basis):

Dry Matter	73%
ME	12.7 MJ/kg
Crude Protein	5.5%
Sugars	60%
Fibre	Nil
Oil	Trace
Ash	13%
Calcium	1.3%
Magnesium	0.3%
Phosphorus	0.1%
Potassium	3.8%
Sodium	0.2%
Litres/tonne	714

Feeding guidelines: Cane molasses is a very flexible and nutritious feed. It can be top-dressed on forages, mixed with dry feeds, or fed in a diet feeder as part of the TMR. A good complement to grass-based diets, where its rapidly digestible sugars are an ideal balancer to the highly degradable protein in the forage.

Dairy cows: Up to 3kg (normal 1-2kg) per head per day or 15% of the total diet mix

Beef cattle: Up to 2.5kg (normal 1-2kg) per head per day or 15% of the total diet mix

Young cattle: Up to 1.5kg or 5% of the total diet mix

Sheep: Lambs 10% of diet (0.4kg per head per day) and ewes 15% of diet (0.8kg per head per day)

Key Benefits:

- ✓ Excellent palatability
- ✓ Rich in sugars
- ✓ High dry matter
- ✓ Improves protein utilisation in grass diets
- ✓ Improves forage intake
- ✓ Good source of calcium

Storage: Can be safely stored in vented waterproof tanks for up to 6 months.

Delivery: Cane molasses is available in bulk deliveries nationwide, ranging from 10 up to 28 tonnes. Also available in IBC's (mini bulk tank) of approximately 1.25 tonnes.
